## EDS 3000

### Description:

The EDS 3000 is a compact, electronic pressure switch with integral digital display. The unit can have one or two switching outputs, and there is the option of an additional analogue output signal (4 .. 20 mA or 0 .. 10 V can be selected).

A special design feature of the EDS 3000 is that the display can be moved in two planes. The unit can be installed in almost any mounting position and the display can be turned to the optimum position without the normally additional expense of a mechanical adaptor.

The 4-digit digital display can indicate the pressure in **bar**, **PSI** or **MPa**. The user can select the individual measurement unit. When changing to a different measurement unit, the EDS 3000 converts all the switching settings to the new unit of measurement.

In the standard model, measuring ranges for relative pressure and absolute pressure are available. In addition the EDS 3000 is also available in a DESINA® version.

The main applications of the EDS 3000 are primarily in hydraulics and pneumatics, and in refrigeration and air conditioning technology.

### Special features:

- One or two PNP transistor switching outputs, up to 1.2 A load per output
- Repeatability 0.25 % max.
- 4 .. 20 mA or 0 .. 10 V analogue output can be selected
- 4-digit digital display
- Optimum alignment - can be rotated in two planes (axes)
- Measured value can be displayed in bar, PSI, MPa
- Output configuration conforms to DESINA® for active self-monitoring
- User friendly due to key programming
- Switching points and switch-back hystereses can be adjusted independently
- Many useful additional functions

## Setting options:

All the settings available on the EDS 3000 are combined in two easy-to-follow menus. To prevent unauthorised re-setting of the unit, a program disable can be activated.

## Setting ranges of the switching points and/or switch-back hystereses:

Measuring range in bar	Switching point in bar	Hysteresis in bar	Increment* in bar
-1 .. 1	-0.97 .. 1	-0.99 .. 0.98	0.01
0 .. 1	0.016 .. 1	0.006 .. 0.99	0.002
0 .. 2.5	0.04 .. 2.5	0.015 .. 2.475	0.005
0 .. 6	0.09 .. 6	0.03 .. 5.94	0.01
0 .. 10	0.16 .. 10	0.06 .. 9.9	0.02
0 .. 16	0.25 .. 16	0.1 .. 15.8	0.05
0 .. 40	0.6 .. 40	0.2 .. 39.6	0.1
0 .. 100	1.6 .. 100	0.6 .. 99	0.2
0 .. 250	4 .. 250	1.5 .. 247.5	0.5
0 .. 400	6 .. 400	2 .. 396	1
0 .. 600	9 .. 600	3 .. 594	1

\* All ranges given in the table are adjustable by the increments shown.

## Additional functions:

- Switching mode of the switching outputs adjustable (switching point function or window function)
- Switching direction of the switching outputs adjustable (N/C or N/O function)
- Switch-on delay and switch-back delay adjustable between 0.00 .. 99.99 seconds
- Choice of display (current pressure, pressure peak value, switching point 1, switching point 2, display switched off)
- Display filter for smoothing the display value during pressure pulsations
- Analogue output signal adjustable to either 4 .. 20 mA or 0 .. 10 V
- Pressure can be displayed in measurement units bar, PSI, MPa. Other units of force, weight, etc can also be set by the user.

## EDS 3000 for self-monitoring:

The pressure switch which conforms to DESINA® has been specially developed for customers in the machine tool and mechanical engineering sectors and corresponds to the DESINA® specification.

A diagnostic signal enables errors to be detected and an "ERROR" message also appears in the display. The electrical connection is a round 5-pole M12x1 plug to IP 67 in accordance with DESINA® requirements.
